Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The status of parent application of this continuation should be updated in the first lines of the specification to reflect a "now abandoned" status.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: In line 4 of the claim, Applicant recites "creating *sand-like* particles. There is no antecedence for this term anywhere within the specification.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. Patent 6,106,869, issued to Botterman et al.

Botterman et al teach of the use of providing a glass sand (a calcium carbonate compound ground, pulverized and milled to a fine sand substance; note col.2, lines 11-41) and creating sand particles; inferably providing an animal terrarium/habitat upon which said sand particles are intended to be placed on a floor of the animal

Art Unit: 3644

terrarium/habitat. In the alternative Botterman et al teach Applicant's method claim as recited, except for the reference specifically addressing the calcium carbonate compound used as being a "glass".

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used glass sand from ground glass bottles, ground stucco material, or any other ground waste glass products, since Applicant states in the specification on page 5, line 13 that "any waste glass product can be used", and clearly some calcium carbonate is known to be produced by the fast cooling magma, which in turn is results in a glass being formed.

Conclusion

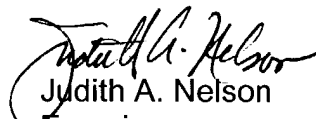

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 3,804,064; 6,250,576; 6,391,349; 6,446,886; 3,557,753; 3,804,064; 4,170,658 and 5,664,523.
